PROFESSIONAL SUMMARY

L2 application support professional with over one year of experience at Cognizant supporting critical business systems on the ServiceNow ITSM platform. Troubleshoots incident, problem, change and request tickets against agreed SLAs using ITIL-aligned processes, keeps CMDB data accurate, and monitors AppDynamics, Control-M and Informatica to keep production stable. ServiceNow Administration Fundamentals certified, with a solid base in SQL, Oracle, Linux and Python. BCA with 9.52 CGPA. Looking for an Application Support Engineer role in Bengaluru.

TECHNICAL SKILLS

Service Desk Management: Incident Management, Problem Management, Change Management, Service Request Management, ticket triage, SLA tracking, L2 escalation handling, root cause analysis, ITIL-aligned ITSM processes and best practices

Ticketing Systems & Service Management Tools: ServiceNow ITSM, CMDB and Configuration Items, UI Policies, Data Policies, Update Sets, ACLs, reports and dashboards, Personal Developer Instance practice

Application Monitoring & Support: AppDynamics (application performance monitoring), Control-M (batch job scheduling), Informatica (data integration), Salesforce, Microsoft Azure, Linux, Unix and Windows environments

Databases & Scripting: SQL, PL/SQL, Oracle Database, MySQL, Python, JavaScript, Microsoft Excel (macros and VBA) for ticket and SLA reporting

Support Channels: Voice support on user calls, email and chat support, updates for technical and non-technical stakeholders, knowledge base writing

Languages: English (professional), Hindi, Marathi

PROFESSIONAL EXPERIENCE

Analyst — L2 Application Support & CMDB | Cognizant Technology Solutions | Pune | Aug 2025 – Present

- Handle around 10 incident, problem, change and request tickets a day on ServiceNow ITSM for a large enterprise client, holding SLA compliance at 95%. Take escalations from L1 and move unresolved P2 incidents to L3 with documented root cause notes.
- Keep CMDB configuration items and their relationships accurate so change impact is assessed correctly.
- Monitor AppDynamics alerts, Control-M batch jobs and Informatica data loads with cross-functional application and infrastructure teams, then fix or escalate failures before they affect business users.
- Check application logs and run SQL queries on Oracle to find the cause of user-reported errors.
- Speak to business users on calls to collect details and explain fixes in plain language, then write knowledge base articles for recurring issues so L1 can close them without escalation.
- Build Excel reports on ticket trends and SLA compliance that the team uses in daily and weekly reviews.

Intern | Cognizant Technology Solutions | Bengaluru | On-site | Jun 2025 – Aug 2025

- Completed on-site training in ITSM processes, ServiceNow, SQL, PL/SQL, Oracle and Linux/Unix, then joined the operations team as an Analyst.

Full Stack Developer Intern | ASORG Softtech India Pvt. Ltd. | Shirpur | Oct 2023 – Nov 2023

- Built responsive websites with HTML, CSS, JavaScript and Python. Ranked first in the machine test.
